

Jeff Eric Cabarrubias

SENIOR SOFTWARE ENGINEER | TECHNICAL LEAD | SOFTWARE ARCHITECTURE

Bohol, Philippines | jeff.cabarrubias@gmail.com

linkedin.com/in/jeff-eric-cabarrubias-9a2271164/ | github.com/idealkingdom

PROFESSIONAL SUMMARY

Senior software engineer with 8+ years of experience across AI developer tools, web applications, C/C++ systems, and software modernization. Led architecture and implementation for an agentic AI VS Code extension and two releases of a cross-platform printer driver. Builds and designs software independently of AI, while applying GenAI where it improves a product or workflow. Comfortable moving among Python, JavaScript/TypeScript, C/C++, and Java and learning unfamiliar systems quickly.

CORE SKILLS

Software engineering: Architecture and system design; technical leadership; code review and mentoring; API and web application development; debugging and performance improvement

AI and developer tools: Agentic AI coding assistants; LLM integration; VS Code extensions; code explanation and suggestions; Mermaid.js; workflow automation

Languages and platforms: Python; JavaScript and TypeScript; C/C++; Java; HTML/CSS; Node.js; Electron; Win32 API; WebView2; SQL and NoSQL; Linux and shell scripting

PROFESSIONAL EXPERIENCE

Senior Application Systems Engineer / Consultant | Fujitsu / Weserv Systems International | 2023–Present

- Technical Lead for Keiken, an agentic AI VS Code extension: guided architecture, developed code explanation, auto-suggestion, and Mermaid flowchart features, integrated model updates, and mentored developers.
- Expanded the extension's language support to Python, JavaScript, C/C++, Java, C#, and other languages; resolved bugs and performance issues across key features.
- Modernized large C/C++ systems by migrating Solaris workloads to Red Hat Enterprise Linux and addressing 32-bit to 64-bit incompatibilities, encoding defects, deprecated code, and shell scripts.
- Developed code-analysis patterns to find migration risks across large codebases; reviewed fixes and supported junior engineers on an election system modernization project.
- Created technical documentation and structured AWS learning paths for a Toyota project, improving the organization of service knowledge transfer.

Software Engineer and Technical Lead | Kyocera Document Solutions | 2021–2023

- Led planning, technical decisions, development, and quality for two major versions of the KX printer driver across x86, x64, and ARM.
- Implemented SHA-2 hashing improvements for SNMP security and a modern help experience using WebView2; maintained core driver code and compatibility across printer models.
- Handled nearly 300 Jira tickets over two years, spanning feature delivery, debugging, code maintenance, and release work.

Survey Programmer, Web Applications | Dynata Global | 2018–2021

- Delivered more than 200 web-based survey projects, including interactive applications and reusable Python/XML modules.
- Built internal developer tools in Electron and JavaScript, including a survey file puller and syntax generator; received the Einstein Award for developer tooling and automation.

EDUCATION AND CERTIFICATIONS

BS Information Technology | Cebu Institute of Technology – University, Cebu City

Claude certifications: CCAR-F, CCAO-F, CCDV-F, CCAR-P | Microsoft Azure AI Fundamentals (AI-900)
